Deborah McGrath is the Carl Biehl Professor of International Studies in the Department of Biology at the University of the South, Sewanee, Tennessee. She earned a BA in Economics and International Relations at the University of Wisconsin Madison, a M.S. in Forest Resources and Conservation and a Ph.D. in Forest Ecology from the University of Florida. Her work focuses on understanding and managing the biogeochemical cycling in wetland and forested ecosystems to address environmental challenges in human-dominated landscapes. She directs the Sewanee Constructed Wetland Research Program, an eight-year research-outreach collaboration between the University of Georgia, the University of the South and the Sewanee Utility District. She also directs the Sewanee Haiti Institute and its coffee-based agroforestry carbon sequestration and community development project.

Emma Zeitler is a junior undergraduate Biology major with a concentration in Ecology and Biodiversity at the University of the South, Sewanee, Tennessee. She researches the ecological effects of constructed wetlands, focusing on anurans. She plans to pursue a career as a wildlife biologist.
